

PANEL SET

The HI-DEX panel set is based around a 19" 1U panel which can accommodate up to six interchangeable cassettes. The cassettes are mounted on sliding runners which allow each cassette to be brought forward independently of the others, providing unrestricted access to every port. The subdivision of the cassettes also facilitates the routing of patchcords to both sides of the panel in order to simplify the management of the patchcords. The addition of a bridge piece ties each row together to provide single-sided routing where required. The front door protects the patches when not in use and provides generous labelling space on both the front and rear faces.

Innovative finger management provides bend radius control and sets a fixed patchcord length to prevent disruption to the fibre during the articulation of the sliding runners.

A matching 1U cable manager provides protected routing across the front of the rack.

ORDERING INFORMATION

Product Set	Product type	Colour
HDX = HI-DEX	PNL = 1U Panel M1U = 1U Cable Manager MNF = Management Fingers	2 = Black 8 = Grey

Example Part No: HDXPNL2 HI-DEX 1U Panel in Black
